

Aman Gupta

+91 8052604654 | amangupta7203@gmail.com | linkedin.com/in/amangdev |
Prayagraj, Uttar Pradesh

Objective

Results-oriented Computer Science student and strong problem solver with hands-on experience in developing full-stack applications. Seeking a Software Developer role to apply my technical skills in building efficient and scalable software solutions.

Education

United College of Engineering and Research

B.Tech – Computer Science Engineering | CGPA: 7.0/10 (till 5th Sem)

Prayagraj, UP

2023 – 2027

Allahabad Public School

Senior Secondary (CBSE) | 80.6%

Prayagraj, UP

2021 – 2022

Skills

Languages: Python, Java, SQL, C

Frontend: React, Tailwind CSS, HTML5/CSS3, React Router

Backend & AI: Node.js, Gemini API, IoT

Databases & Platforms: Supabase (Postgres), Firebase, Git/GitHub, Render, Netlify

Projects

Arohan – Autonomous Campus Safety System

- Designed and implemented the autonomous rover module integrating MPU6050 gyroscope with a proportional (P) controller to maintain stable trajectory during real-time hazard verification.
- Developed a real-time sensor data transmission pipeline using ESP32 Wi-Fi to send normalized hazard data to Firebase; implemented weighted hazard scoring (0–100) using multi-sensor fusion (MQ-135, MQ-2, Temperature) for automatic zone classification (Safe/Warning/Danger).
- Achieved an average system response latency of 8.4 seconds, reducing manual verification delay by 90%.

EcoBin – IoT Smart Waste Management System

- Engineered an end-to-end IoT solution to optimize waste collection, featuring a real-time admin dashboard built with JavaScript and Firebase for live data visualization from sensor-equipped bins.
- Developed a companion Android application to provide workers with GPS-based optimized collection routes, designed to improve operational efficiency and resource management.

MailExtracto – Intelligent Automation Bot | Top 10 Finalist, IIT Bombay

- Built an intelligent automation pipeline using Datamatics TruBot and TruCap+ to extract structured data from emails and reduce manual data entry.
 - Earned recognition as a Top 10 Team at IIT Bombay Techfest 2024.
-

Leadership & Achievements

Top 10 Team Recognition

Techfest IIT Bombay

2024

Project Tech Lead

Full Waste Management System – Coordinated development of a 3-part system
